

Flood kit checklist

Creating a Flood kit is a good way to be ready for flooding. You can do this anytime or when you know flooding is expected.

Your Flood kit should include:

- Torch and spare batteries
- First aid kit
- Any prescription medicines you might need
- Warm, waterproof shoes and clothes
- Rubber gloves
- Bottled water and snacks
- Essential pet and children's supplies (like pet food and nappies)
- Insurance documents
- Passports
- Portable wind-up or battery powered radio (and spare batteries)
- A list of important phone numbers

Store your Flood kit in a waterproof box and put it somewhere high up.

*Cut out this checklist to help you prepare your Flood kit then use the label on the back to stick onto your Flood kit box so you can easily find it when you need it.

Keep your phone charged and close by so you can stay aware of what's happening too.
